

PROFESSIONAL
UNGER[®]

Connect & Clean System by Unger[®]

High-access cleaning simplified. Most Unger Professional[™] tools can be attached to Unger's patented telescopic pole system, turning one tool into a complete cleaning system.

Cleaner

- Microfiber products **require no toxic chemicals** to clean effectively – just add water.
- Microfiber **holds 7 times its own weight in water**, so you need less water to clean.
- According to independent laboratory testing, microfiber **picks up 99% of dust, dirt and bacteria** that the naked eye can't even see!

Faster

- Cleaning with an extension handle is **10x faster than cleaning with a hand held tool and a ladder***.

Safer

- Each year, there are more than **247,000 emergency room related injuries in the U.S. due to falls from ladders and stools****. Eliminate the ladder!
